Rev. 1.0, Monday, July 3, 2017

Goal: Create a simple web interface that will allow users to create an account, view the site, create posts to sell tickets, and browse tickets.

Task listing:

- i. As a buyer, I want a place to look for tickets that people have for sale.
1. Create the main visual interface for the website (time estimate)
 - ii. As a seller, I want a place to post tickets that I have for sale.
2. Create visual interface for posting tickets
3. Create way to store information about the ticket
4. Create way to display it on main page
 - iii. As a buyer, I want a search function so that I can buy tickets I am interested in.
5. Implement search functionality to search for tickets
