Goal: Create a simple web interface that will allow users to create an account, view the site, create posts to sell tickets, and browse tickets.

Task listing:

1. As a seller, I want a place to post EDM event tickets for sale (quantity, location, price, option to set firm price or have OBO option, ticket type).
 - a. Graphical interface to post (2)
 - b. Set up database to store information about post (2)
 - c. Upload images (3)
 - d. Write to database (2)

Total hours: 9

2. As a buyer, I want a place to look for EDM tickets that people have for sale by event name, price, or search bar.
 - a. Graphical interface (home page) (2)
 - b. Read from database to display to home page (2)
 - c. Sort by name, price, event (3)
 - d. Search bar (4)

Total hours: 11

3. As a buyer or seller, I want to create user accounts to let users save their data and build a community.
 - a. Database to store account information (2)
 - b. Graphical interface (my account page / their account page) (2)
 - c. Read from database to display to account page (2)

Total hours: 6

Team roles:

	Team Role	Task Assignment
Brian Fabello	Product Owner	
Jerry Liu	Member	
Justin Lau	Member	Search bar and search function
Nathan Wakefield	Scrum Master	Sort
Tommy Tran	Member	Read more about web2py
Alhomaidi Alotaibi	Member	Read more about list-view and its implementation in JavaScript, and start implementing the UI.
